Tarefa Básica - Quadriláteros

01)

$60 - 15 = 45°$

$15°$

$180 - 105 - 60 = 15°$

$105 + 45 = 150$

$X = 180 - 150$

$X = 30°$

R: D

02)

$180 - 45 - 60 = 75$

$\dfrac{180 - 150 = 30}{2} = 15°$
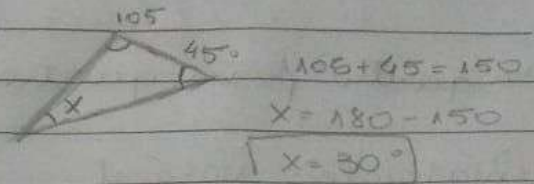

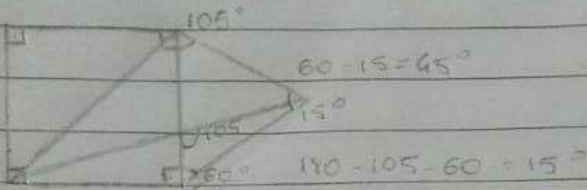

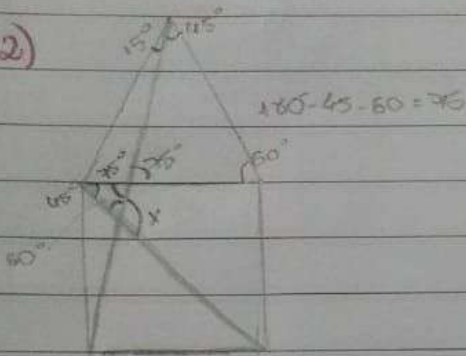

$75 + 45 = 120$

$180 - 120 = 60$

$X = 180° - 60°$

$X = 120°$

R: C

04)

A   A'
4   8
B   B'
2   x'
C   C'
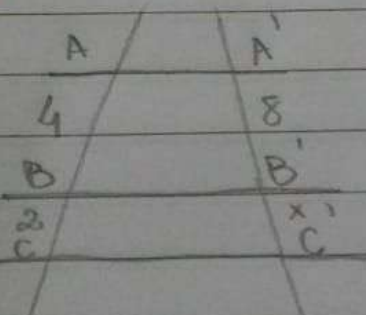

$\dfrac{4}{2} = \dfrac{8}{x}$

$4x = 16$

$x = \dfrac{16}{4}$

$x = 4 cm \Rightarrow B'C'$

R: 4cm

05) Falsa - (E).

Pois nem todos os paralelogramos terão lados congruentes, que é a propriedade do losango.
